

Recommendation Letter

Focused, determined and result oriented are the key attributes that I have observed in my student, Mr. Ashutosh Patel. He has shown zest, energy and enthusiasm towards his chosen subjects and is amongst my devoted students of bachelor's degree in Mechanical Engineering. His academic records have been excellent throughout his undergraduate studies. His academic graph justifies his interest which is much deeper and his caliber much higher. I say this having observed his extra efforts by putting in long hours of dedicated research and concentrated work with focus to better his given performance. He is confident in his abilities and is able to achieve whatever he sets his mind to. Thus, he deserves an opportunity to gain cutting-edge knowledge of requisite tools and technologies which will help him to achieve his long-term academic and professional goals.

He has attended my classes on Manufacturing Process-1 in 3rd semester and Operation Research in 7th semester. As an avid reader, he undertook a wide array of reading on diverse topics from within and beyond prescribed. As a result of which he is able to valuably contribute new ideas and suggestions which lent depth to class discussion and debates. All his arguments were always backed by his logical reasoning and factual support.

By Ashutosh's classroom behaviour any faculty can notice his intelligence, diligence, eagerness to learn and respect towards faculties. He is a fluent and effective communicator. He is articulate and is able to express his ideas with depth, clarity and purpose. This was evident when he undertook seminar presentation on "Games Theory and Finding Optimal Solution for Inventory Management" in 7th semester. I have observed his poise, style and impressive presentation skills. I have appreciated his ability to comprehend and merge other relevant aspects of the main subject which added depth and substance to his work. His confidence stemmed from his sound knowledge of the subject with which he is able to tackle question-answer session with ease.

He regularly displayed his acumen through his participation in various extra-curricular activities. He won an appreciation prize during his participation in regional Robotics competition "Catch me if you can". He also participated regularly in state-level college techno fest events. Moreover, he was also a key organizer for state-level techno-fest and cultural event held and was a coordinator at Sabarmati Festival under my guidance. He did a splendid job in terms of planning, implementing and execution of events. He showed himself as a reliable, ready to help person with a good ability to confront faculties on various issues.

Having done all this and with so much of commitment and enthusiasm, I am confident of Ashutosh's ability to succeed at master's program. I have observed his creativity and discipline which will help him to do well. Thus, I wholeheartedly recommend his admission in your university.

Sincerely,

Name: Prof. Jigar Dave

Designation: Assistant Professor, Mechanical Engineering Dept.
